

# Technical Bulletin

## Replacement Notification for 150 mm X 65 mm Forks

This Technical Bulletin announces a Product Replacement Program for Cascade Forks sized 150 mm X 65 mm (6 in. x 2.5 in.). These forks, manufactured from steel heat batches 668308 and 668309, may not meet material specifications and could result in fork failure.

After identifying the affected forks you sourced from Cascade, contact your Cascade Fork Division Warranty Department at 1-877-227-2233 to confirm the subject forks have been **removed from service and destroyed**. Shipment of replacement forks will be coordinated at that time.

Cascade requires a Certificate of Destruction be completed and returned to Cascade for all forks subject to the Product Replacement Program.

**WARNING:** These conditions can result in equipment failure, personal injury, property damage or death.

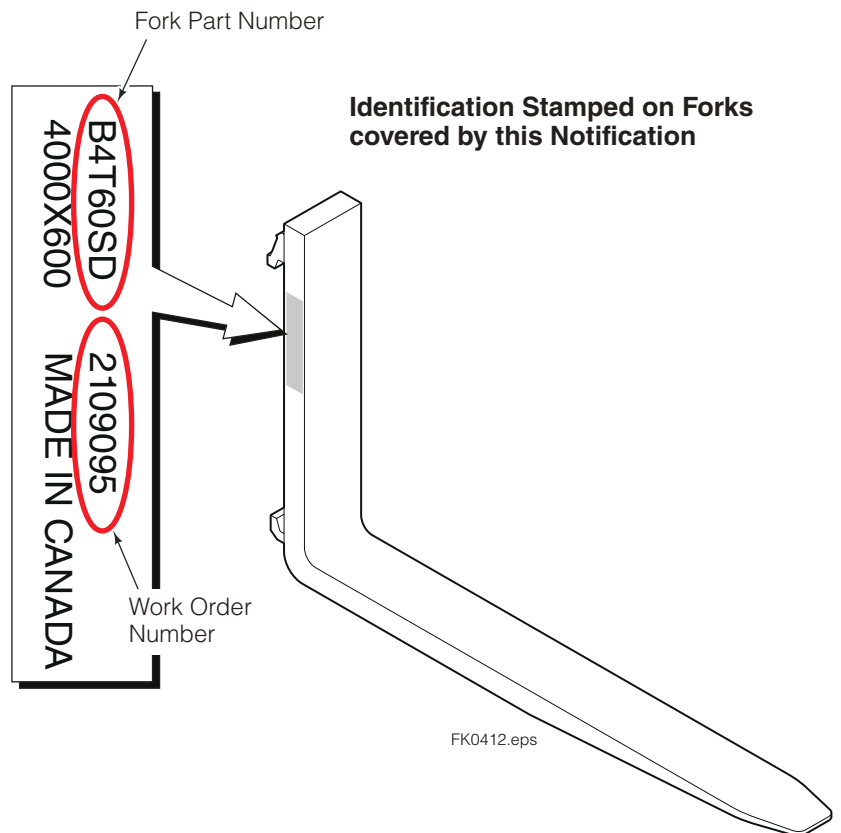

### Warranty Information

Contact the Cascade Fork Division Warranty Department, 1-877-227-2233 to initiate a Warranty Claim for affected forks.

Cascade is authorizing 1 hour labor and 2 hours travel time per set of forks.

### Fork Part Numbers and Work Order Numbers

See the attached letter for details specific to your purchase.

**NOTE:** This information should not be interpreted as the basis for warranty claims unless so designated.
