

Paper Tube Winder

Product Description

This machine is used to manufacture thin, medium walled paper tubes and cores for tissue rolls, fax rolls etc.

Output : Up to 15 mts/min. depending upon the sizes of the tube
Minimum inner diameter : 25 mm
Maximum inner diameter : 100 mm
Maximum wall thickness : 5 mm

MAIN FEATURES OF THE MACHINE

- Higher output
- Electronic proportional control system for winding speed adjustment
- Rapidly interchangeable mandrels
- Pneumatic control of winding belt tension
- Built-in control panel with remote station
