

PRIME MINISTER SCOTT MORRISON VISITS MAK WATER

MAY 25TH, 2022

MAK Water was honoured on Friday 20th May 2022 to receive a visit from Prime Minister Scott Morrison and Mrs. Morrison at our Malaga Headquarters.

MAK Water's CEO [Andy Byk](#) was out of action with COVID so the Chairman, Peter Hood AO, showed the Prime Minister the factory and inspected some of the 12 water treatment plants currently under-construction, including a project for the Centre for National Resilience under construction in Bullsbrook, Western Australia and a 3.7ML/day desalination plant for a remote mine in New South Wales.

The highlight of the Prime Minister's visit was news that we have been awarded a \$2 million grant under the Supply Chain Resilience Initiative, for us to invest in more on-shore manufacturing in Australia.
