

## Pasaban sheeters continue to be the quality benchmark in the paper and board sector

2018-04-25

For more than four decades the main paper & board mills and converters worldwide have entrusted Pasaban for the design and manufacturing of their sheeting machines; [Iggesund](#), [Mondi](#), [Naini Papers](#) and [Karton-Pak](#), among others. The key features they that seek are flexibility, productivity and the highest quality in the finished product.

Our sheeters operate on paper, cardboard and cellulose and in every type of formats including A3, A4 and digital formats. They are the ideal machines for paper and cardboard producers, paper finishing facilities, conversion plants and printers with medium to high production capacities.

The [KB](#) model, for example, is a highly demanded machine in the paper and cardboard manufacturing sector. Due to its many customisation options, it can be adapted extremely well to the customer's specific needs. Similarly, the [Compact](#) model is a modular design sheeter mainly targeted for medium production capacity converters and folding carton printers.

The lifetime of our machines is another reason why customers decide to opt for Pasaban Machines. We guarantee that our machines will highly perform for longer periods of time thanks to our [maintenance](#) and [upgrades](#) services. Some clear examples are the two recently upgraded [KDD](#) sheeters. Located in [ITC Limited](#) and in [Domtar \(USA\)](#) respectively, after more than 20 years of intensive use they have been successfully upgraded ensuring its functionality for a further 10 years.

Pasaban is constantly innovating to provide the best solution for our customers. We apply all our knowledge to be able to technologically differentiate in segments as demanding as the security printing & banknotes. Our double rotary sheeters [SPD](#) and [SP](#) models are designed to cut-to-register security paper with extreme accuracy.

To find out more about our full range of paper and cardboard sheeters, please [contact](#) us or download the product specs sheets from our [paper sheeters](#) section.
