

Pasaban to Upgrade Foil Stamping Line for Crane Currency

2022-04-04

Pasaban will upgrade the foil stamping line for FS1 in Tumba, Sweden. It will be an electrical refurbishment and will take place by the end of the year.

Crane Currency, a Crane Co. business, is a fully integrated supplier of banknotes to central banks around the world. A pioneer in advanced micro-optical technology that offers a wide range of visual effects that increase the level of security and public confidence in banknotes.

"We continue positioning ourselves as a global benchmark in paper and board converting machinery upgrades, including the security sector. It motivates us to have the opportunity to carry out this project for a reference like Crane". - Iñigo Pagola, Service Manager at Pasaban.

More and more companies are trusting Pasaban to carry out an upgrade, even if their machinery is of other brands. In this case, the electrical refurbishment was carried out for the Kurz stamping line.

The benefits of upgrading your machine include increasing the availability and performance and improving the quality of the finished product. In turn, you will increase productivity, mitigate obsolescence and enable the automation of some of the machine's processes.

This is another clear example of Pasaban boosting the service department. The main reason customers rely on Pasaban is because of the ability to offer the best service, with a specialized engineering staff at a competitive market price.

Pasaban Upgrades is part of Pasaban Service, which encompasses a range of services aimed at manufacturers, converters, and printers. These include Online Assistance, Maintenance, Spare Parts, and Machine Relocation services.

Finally, and in order to continue offering our customers the best possible service, we have compiled and have a catalog of upgrades and possible improvements that we put at your disposal.
