

DRUPA 2016 – RE PRESS RELEASE

The 16th edition of Drupa closed its doors few days ago with excellent numbers: about 260.000 visitors from 180 countries. Re took part in this successful edition with a 75sqm stand located in hall 12 and, other than many important upgrades to its systems for the control of the web tension, the alignment of the web and print inspection, it showed two important news: a new web viewing system and the Wi-Fi management for an easy, intuitive and quick check of our equipment using a mobile device.

The focus of the booth was on a demo machine, specifically designed for Drupa, where the entire wide range of Re products were installed, attracting the attention and curiosity of many visitors interested to know information about products and technologies of the Italian company.

Web viewing system: with the motto “One shot full zoom picture capture” the system is made up of a camera equipped with two optics to guarantee a very high image quality and a faithful reproduction of colors without any distortion of the image. Zoom 10x, field of view of 200x150 mm and the possibility to update the software remotely, make the system easy to use and suitable to control every kind of printing. The DSP, very compact (225x165x35 mm), is integrated with the digital monitor HDMI (1920x1080 px) avoiding problems of space, cabling and interference.

Wi-Fi management: Re main aim is always study and produce equipment extremely easy to install and manage in every working condition; solutions that guarantees the best result with the least effort for the customer. For this reason, the Italian company studied an important new that will change your way to control and calibrate Re equipment. Re studied a new way to control Smart motion web guides and CPF load cells using a mobile device throughout the Wi-Fi technology.

No cables, user-friendly graphic, great savings of times for cabling and calibration; with a mobile device you can smoothly control your equipment wherever you are inside your company.

Moreover “the positioning of Re compared to the last edition of Drupa has been significantly increased, symptom of an important growth we are facing both in technology, sales and quality services we can offer to customers.” Explains Mr. Colombo, Operating Director of Re “everybody could see that 90% of pneumatic brakes installed on machines at the show we branded with Re logo, moreover lot of load cells, tension controllers and web guiding systems with our logo where installed. This important success at Drupa allows us to look ahead with optimism aware that the way faced in recent years is the right way to make another important step”

“At the end of Drupa we can assert that we met all our targets: many interesting visitors from many countries, real a good interest both for new products and the well-known ones, attention to company values and solidity.”
